

Congress of the United States
Washington, DC 20515

April 29, 2022

The Honorable Rosa L. DeLauro
Chair
Committee on Appropriations
H-307 The Capitol
Washington, D.C. 20515

The Honorable Kay Granger
Ranking Member
Committee on Appropriations
H-307 The Capitol
Washington, D.C. 20515

The Honorable Marcy Kaptur
Chair
Subcommittee on Energy and Water
Development, and Related Agencies
2362-B Rayburn House Office Building
U.S. House of Representatives
Washington, D.C. 20515

The Honorable Michael K. Simpson
Ranking Member
Subcommittee on Energy and Water
Development, and Related Agencies
2362-B Rayburn House Office Building
U.S. House of Representatives
Washington, D.C. 20515

Dear Chair DeLauro, Ranking Member Granger, Chair Kaptur and Ranking Member Simpson,

As you begin crafting the fiscal year 2023 Energy and Water Development, and Related Agencies appropriations bill, I respectfully request that you include funding for the Great Lakes Coastal Resiliency Study (GLCRS) proposed by the U.S. Army Corps of Engineers (USACE), with the USACE Buffalo District located at 1776 Niagara Street, Buffalo, NY 14207. Specifically, I request that you provide \$2,400,000 for the GLCRS, in addition to the \$600,000 requested for the study in the President's Budget Request for Fiscal Year 2023.

This project would be a valuable use of taxpayer funds because it would contribute to the continued development of a long-term strategy across the Great Lakes states to more efficiently and effectively manage and protect the Great Lakes coastline. Your subcommittee took a critical step in advancing these goals by providing \$500,000 for the GLCRS in the fiscal year 2022 Energy and Water Development, and Related Agencies appropriations bill. With communities throughout the region continuing to face the threat of devastating flooding and further damage to coastal infrastructure, it is essential that Congress maintain strong support for the program in fiscal year 2023 and fully fund the GLCRS up to USACE's current project capability of \$3,000,000.

Under the USACE Great Lakes Coastal Resiliency Study, Army Corps would be well-situated to partner with local authorities across the eight impacted states, as well as other federal agencies, to address the very real threats facing the over 5,200 miles of shared Great Lakes coastline. This study is especially critical in the district I represent in Central New York, which has faced historic flooding along Lake Ontario's southern shore in recent years, resulting in millions of dollars in damage to residences, businesses, and shoreline infrastructure. Information and

resiliency measures proposed under this study would directly benefit our shoreline community, as well as communities throughout the Great Lakes region.

I certify that neither I nor my immediate family has any financial interest in this project. Furthermore, I am not aware of any other Member of Congress submitting a request for this purpose.

Thank you for your time and consideration of this request.

Sincerely,

A handwritten signature in blue ink, appearing to read "John Katko", with a stylized flourish at the end.

John Katko
Member of Congress
